

COURT STENCIL

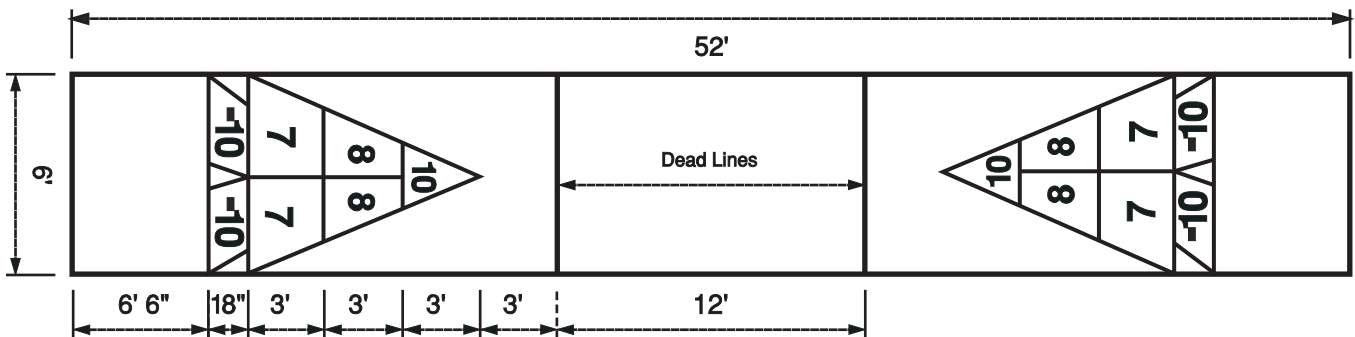

The Shuffleboard Stencil Kit contains (3) pieces of plastic. First, open the box allowing stencils to flatten. Second, use wood (a six-foot 2" X 4" is recommended) or other weight to hold the stencil down so you get a good, clean line.

Place stencil (A) on the left side of the court. Next place stencil (B) on the right side. Stencil (C) then completes the triangle at the top. Stencil (C) is also used to put the dead lines on the court

Overlap each piece until the lines intersect, then spray on the lines. Spray the dotted line on section (C) to use as a guideline, then rotate section (C) and use the six-foot (6') line to connect the dotted lines.
